

Patrick Habchi

SOFTWARE ENGINEER

Byblos, Lebanon | +961 70 710 892 | habchipatrick@gmail.com

Professional Summary

Full Stack Developer with a strong foundation in React.js, Node.js, and modern web technologies. Committed to building efficient, user-focused applications and delivering clean, scalable code. Seeking to contribute to a dynamic team and continue growing as a software developer.

Experience

Full Stack Developer | Suyool | Lebanon

01/2024 – Present

- Contributed to the development of multiple internal and customer-facing platforms
- Developed responsive, API-integrated frontends using React.js and Redux
- Built secure and scalable backend services using PHP with Symfony
- Focused on intuitive UI/UX to enhance usability and performance
- Integrated APIs for financial services including multi-currency accounts and card operations

Full Stack Developer | Ete-Services | Lebanon

10/2023 – 03/2024

- Built frontend interfaces using React.js and Redux for dynamic state management
- Developed backend services with Express.js and Inversify for scalable, modular architecture
- Handled API communication with Axios and Redux Thunk for smooth async operations
- Implemented secure middleware and validation for robust backend functionality

Projects

HR System

- Developed a full stack HR management system using React.js and Symfony PHP
- Built RESTful APIs, authentication, authorization, and role-based access control for secure user and leave management
- Implemented OTP-based password reset via email, automated email notifications, and backend validation rules
- Added pagination, form validation, and structured database logic to support multiple leave types and leave balances

Custodo Services

- Developed a responsive company website using WordPress and Elementor
- Designed and customized pages to deliver a modern, user-friendly interface
- Improved responsiveness, layout consistency, and overall user experience across devices
- Live site: <https://www.custodoservices.com>

OnPoint Services

- Developed a responsive business website for a US-based service company using React
- Focused on clean, user-friendly design and performance across devices
- Live site: <https://www.on-point-services.com>

Paragon Facility

- Built a responsive website for a US-based maintenance company using React
- Focused on clean UI and enhanced user experience
- Live site: <https://www.paragonfacility.com>

Education

LCU | Lebanese Canadian University | Lebanon
